Northern Virginia Urban Forestry Quarterly Roundtable

Stormwater Management and Urban Forest Conservation Through Stream Channel Redesign

Thursday, August 22, 2013
Fairfax County Government Center
Conference Rooms 9-10
12000 Government Center Parkway
Fairfax VA 22035

Stream channel restoration or redesign is becoming a popular method for dealing with stormwater. But they are controversial because they often require tree removal during construction. We will discuss how well they work and their effect on the urban forest.

9:30 - 10:00  Sign-in and Networking

10:00 – 10:15  Welcome and Announcements
Jim McGlone, Chair Northern Virginia Urban Forest Roundtable and Virginia Department of Forestry

10:15 - 10:45  Stormwater, Streams and Trees
